

GLAZING FILMS AND BLINDS

Welcome to Glazing Films

Glazing Films solutions offer a long life and cost effective method of adapting existing glass to meet individual requirements.

Unprotected glazing can potentially be very dangerous to us all. Without film or blinds, an ordinary piece of glazing offers little or no protection against the hazards of daily life.

Our customers benefit from our professional service and knowledge of the latest products and technologies available in the window film marketplace.

Opposite are details of the types of products we offer. Please do not hesitate to contact us if you require further information.

CLEAR SAFETY & SECURITY FILMS

These films are tested to BS6206 Class A and above and upgrade sub-standard glazing to meet the requirements of the workplace. Safety and Security Films are also specified to provide solutions to many other glass related safety problems including bomb blast protection.

COMBINATION SOLAR SAFETY FILMS

Offers the same protection as safety films with the added benefit of protection from the sun's glare and heat build up as well as offering privacy with one way vision during daylight hours.

SOLAR & LOW-EMISSION FILMS - IDEAL FOR HOT CONSERVATORIES

Offers protection by removing the solar heat, glare and ultraviolet light. Reduces energy consumption of heating or cooling a building and often improves the look of a building.

PRIVACY & MANIFESTATION FILMS

Whether in the home or at work privacy film can convert ordinary unsightly glass into an attractive feature. Manifestation films provide a visual barrier on glass to avoid accidental collision and can be used to raise corporate identity.

ANTI FADE FILMS

Reduces fading by rejecting up to 98% of damaging and harmful ultraviolet light rays.

ANTI GRAFFITI FILMS

Can be applied to most smooth surfaces to offer protection from unwanted graffiti.

ANTI GLARE FILMS

Ideal for reducing glare from computer monitors as well as providing privacy and visual security.

AUTO TINTING

Offers privacy, solar protection, security in the event of a 'smash and grab' and enhances the appearance of any vehicle.

SOLAR & BLACKOUT BLINDS

Solar, heat protection and light control can be further enhanced with specialist blinds.

WE ARE ALSO CUBICLE AND CURTAIN TRACK SPECIALISTS.

GLAZING FILMS AND BLINDS

Solar & Low Emission Film (Ideal for hot conservatories)

Offers protection by reducing the solar heat, glare and ultraviolet light. Reduces energy consumption of heating or cooling a building and often improves the look of a building.

Reduce solar heat gain by up to 80% as well as effectively reducing eye strain and associated headaches caused by visible glare on computer monitors.

The result is a more comfortable working environment ensuring higher productivity and efficiency.

FEATURES

- Reduces visible glare
- Reduces solar energy transmission
- Reduces ultraviolet radiation
- Aesthetically pleasing
- Scratch resistant

BENEFITS

- Increases comfort levels - reduces eye strain
- Reduces Solar heat gain - saves energy usage
- Protects against fading - blocks harmful UV rays
- Visual enhancement - professional uniform appearance
- Protects the product

APPLICATIONS

- Conservatories
- Curtain walling
- Glass exteriors
- Glazed partitions
- Roof lights
- Structural glazing
- Windows

GLAZING FILMS AND BLINDS

Privacy & Manifestation Film

Glazing Films offer an inexpensive solution to privacy in the home or workplace and glass identification by supplying and installing specialist materials to the glazing.

Whether in the home or workplace, privacy film can convert ordinary unsightly glass into an attractive feature.

Manifestation films provide a visual barrier on glass to avoid accidental collision, and can be used to raise corporate identity.

Manifestations, which must be obvious and conform to health and safety regulations, can take the form of any pattern or even company logo, transforming your glass into part of your advertising media.

FEATURES

- Avoid accidents
- Legal compliance
- Marketing opportunity
- Aesthetically pleasing

BENEFITS

- Make your work place a safer environment
- Comply with the Workplace (Health, Safety & Welfare) Regulations 1992 (1996 revision)
- Useful additional advertising opportunity
- Visual enhancement – professional appearance

APPLICATIONS

- Home*
- Office interiors/doors
- Patio areas
- Shop fronts
- Show rooms

GLAZING FILMS INTERIORS

Welcome to Glazing Films Interiors

You can order Interior Window Film online at www.glazing-films.co.uk, and select the Interior Film option from the menu. From there, you can choose from one of our catalogue designs, or you can contact us for a bespoke option.

An opaque adhesive vinyl, Interior Window Film looks like expensive etched glass but is a lot easier to install and costs a fraction of the price. It's perfect for:

- Street facing windows
- Glass door panels
- Bathrooms
- Kitchens
- Offices
- Glass cupboard doors
- Patio doors

All you have to do is measure your windows and we cut the film precisely to your measurements. By following our easy to follow instructions you will achieve truly professional results.

ORDER NOW

Visit www.glazing-films.co.uk, and select Interior Window Film.

GLAZING FILMS AUTO TINTING

Auto Tinting

Offers privacy, solar protection, security in the event of a 'smash and grab' and enhances the appearance of any vehicle.

Glazing Films enhances the safety, security and privacy of your vehicle by reinforcing and tinting your vehicle glass. You can choose to tint your windows from a wide variety of different shades of film.

New laws enforced in January 2004, prevent film being applied to the front windscreen and the driver and front passenger's windows.

FEATURES

- Blocks out over 99% of UV radiation, reducing fading of the interior
- Reduces heat gain
- Reduce glare to ease eyestrain
- Various shades of high quality tints

BENEFITS

- Improves appearance
- Reduces glare - cuts down dazzle from the sun and lights at night
- Reduces heat - Keeps your vehicle cooler on sunny days
- Protects against UV rays - protects you, your passengers and pets
- Increases privacy - ideal for women driving alone at night
- Improves security - difficult for thieves to look into your car at night

GLAZING FILMS AND BLINDS

Solar & Blackout Blinds

Glazing Films install a wide range of Solar and Blackout Blinds which reduce temperature, protect furnishings from fading, reduce glare and control light.

Solar Blinds can greatly improve working conditions, especially those in computer based or light sensitive environments. They also help to control temperatures thereby reducing, or eliminating altogether, the need for costly air conditioning systems.

FEATURES

- Reduces visible glare
- Reduces solar heat gain
- Creates a 'blackout' environment
- Huge range of styles and colours
- MRSA resistant*

BENEFITS

- Increases comfort levels, reducing eyestrain
- Reduces solar heat gain - saves energy usage
- Provides light control
- Aesthetically pleasing/corporate

APPLICATIONS

- Conservatory and atrium roofs
- Classrooms/schools
- Dark rooms
- Home
- Hospitals and health centres

* Rigid PVC blinds
